1105 NC-54 APT #A12, Chapel Hill NC 27516

SUMMARY

Driven developer with a broad technical skill set. A strong communicator with experience managing full project lifecycles, and coordinating with teams remotely and in-house. Seeking a developer position in an energetic company.

PROFESSIONAL EXPERIENCE

Rivers Agency. Chapel Hill, North Carolina

Front End Developer, August 2016–Current

- Developing a touchscreen app to demonstrate [Cree SmartCast](#) at [industry conferences](#), accepting user-defined sequences to highlight SmartCast features and ease of integration into Building Automation Systems. Technologies used include Ubuntu, NodeJS, HapiJS, MongoDB, CoAP, REST, and React.
- Maintaining application used for tracking students progress for [NC AHEC](#) Passport Program. Tasks include integrating the application into Amazon Web Services and sending emails with Simple Email Service. Technologies used include Docker, NodeJS, Express, Postgres, REST, and AngularJS 1.X.
- Working closely with development team to relaunch [Cree.com](#). Technologies used include Magento EE, PHP, MySQL, Sass, Gulp, and Git.
- Maintaining Cree, Inc web presence, including [e-conolight](#), [Wolfspeed](#), [lighting.cree.com](#), and [creebulb.com](#). Technologies used include Magento EE, Wordpress, PHP, MySQL, Angular 1.X, Sass, Bootstrap, Gulp, and Git.
- Developing various other websites using different technologies, including Wordpress, flat PHP, and Sass. Such websites include [betterlight.cree.com/mclaren/](#), [Artisan & Post](#), [UNC Innovate](#), and more.

Defy Media, Inc. Los Angeles, California

Sr. Web Applications Developer, January 2014–July 2016

- Supporting daily technical requirements of an array of publications representing 100M unique users and 500M pageviews monthly for multiple CMS, including Wordpress.
[The Escapist](#) [GameTrailers](#) [GameFront](#) [Teen.com](#) [EveryJoe](#)
[gURL.com](#) [Cage Potato](#) [TheGloss](#) [Mommyish](#) [Holy Taco](#)
- Migrated GameTrailers.com's infrastructure to a CMS in a 3 month timeline. This included an archive of 18,000 videos, 200,000 users with associated metadata, and 2.2 million forum threads.
- Implemented HTML5 Video Player using VideoJS, LiveRail, and Google Analytics for use on multiple websites exceeding 30 million monthly streams.
- Designed and developed image gallery technology which increased advertising value by a factor of four, while also increasing the engagement of readers. This application was used on multiple websites.
- Implemented The Escapist's [Channel Expansion](#) to support a larger variety of content for custom LAMP CMS and JavaScript.
- Developed, QA, and supported multiple publications' community events created with LAMP CMS, JavaScript utilizing jQuery, and CSS.

Alloy Digital, Inc. New York, New York

Lead Developer, November 2012–January 2014

- Maintained and optimized several publications that utilized a custom LAMP CMS.
[The Escapist](#) [Warcry Network](#)
- Designed, developed, and maintained analytic events capture system using NodeJS MongoDB and Redis. This system would capture events from a front end tool to store into MongoDB and sync to a Redis cache for [Smosh](#).
- Maintained Wordpress plugin that allowed users to sync between Wordpress and an external message board using PHP. <http://my.gURL.com>.

Themis Media, Inc. Durham, North Carolina

Lead Developer, September 2008–November 2012

- Optimized, maintained, and supported staff's request and vision for custom LAMP CMS.
[The Escapist Warcry Network](#)
- Worked with a small team to develop a PHP adaptor for HandlerSocket's noSQL solution to speed up the system ability to receive data from a MySQL database.
- Implemented phased redesign of [The Escapist](#) using PHP and JavaScript.
- Developed a meta tagging service for LAMP CMS to allow content to plug into ad platforms and analytic tools using Sphinx, PHP, and JavaScript.
- Worked with marketing and creative teams to build promotional material for clients including interactive apps and community driven games.
